

# Meetinkz

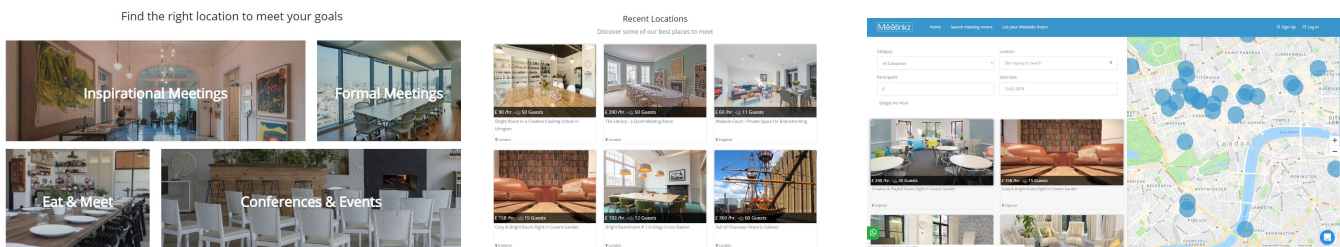

“Nirav is a passionate and dedicated person. He's invested in the project, and you can feel his total focus on solving the problem at hand. It's my third or fourth project with Nirav now, and I also know of at least one friend I recommended work with him that is also very happy.”

- **Amidan Roth**

**Meetinkz** is a responsive web application made for organizing meetings and events for Israel and UK market. **Meetinkz** allows user to choose the exact space to hold a successful and individualized meeting. Once use has defined the goals which user wish to achieve in their meeting, **Meetinkz** invite you to browse dozens of spaces at your disposal and choose the one that will optimally help user create your target atmosphere. User can present lectures and powerpoints with leading edge technology, or even hold an annual review in the private room of an award winning restaurant.

We have taken up existing project of client and understood it in **short time**. Our team supported client **by adding new functionality and resolving bugs** to help client **to meet milestones**.
